Datasheet for ABIN1458694  
**LRCH1 Protein (AA 1-251) (His tag)**

## Overview

Quantity:	1 mg
Target:	LRCH1
Protein Characteristics:	AA 1-251
Origin:	Cat
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This LRCH1 protein is labelled with His tag.
Application:	ELISA

## Product Details

Sequence:	DVDMAMIEQL REAVDLLQDP DRLSTDVSER NVVNFYPVES AEALDLQDSA LNGQIQLETS PVCEVQNDLT LQSNSEYSP NEIRANSPAI SPTANSTGPF GLKPRSVFLR PQRNLESIDP QFTIRRKMEQ MREEKELVEH LRESIEMRLK VSLHEDLGAA LMDGVVLCHL VNHIRPRSPA SIHVPSPAVP KLSMAKCRRN VENFLEACRK LGVPEEKLCCL PHHILEEKGL VKVGITVQAL LDVTVTKSLF T
Specificity:	Felis catus (Cat) (Felis silvestris catus)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

## Target Details

Target:	LRCH1
Alternative Name:	Leucine-rich repeat and calponin homology domain-containing protein 1 ( <a href="#">LRCH1 Products</a> )
Background:	Recommended name: Leucine-rich repeat and calponin homology domain-containing protein 1. Alternative name(s): Neuronal protein
UniProt:	<a href="#">P41737</a>

## Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

## Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
