## FKBP1B Protein (AA 2-108) (His tag)

#### Overview

Alternative Name:

Quantity:	1 mg
Target:	FKBP1B
Protein Characteristics:	AA 2-108
Origin:	Cow
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This FKBP1B protein is labelled with His tag.
Application:	ELISA
Product Details	
Sequence:	GVEIETISP GDGRTFPKKG QTCVVHYTGM LQNGKKFDSS RDRNKPFKFR IGKQEVIKGF
	EEGAAQMSLG QRAKLTCTPD VAYGATGHPG VIPPNATLIF DVELLNLE
Specificity:	Bos taurus (Bovine)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %
Target Details	
Target:	FKBP1B

Peptidyl-prolyl cis-trans isomerase FKBP1B (FKBP1B) (FKBP1B Products)

#### **Target Details**

Background:

Recommended name: Peptidyl-prolyl cis-trans isomerase FKBP1B.

Short name= PPlase FKBP1B.

EC= 5.2.1.8.

Alternative name(s): 12.6 kDa FK506-binding protein.

Short name= 12.6 kDa FKBP.

Short name= FKBP-12.6 FK506-binding protein 1B.

Short name= FKBP-1B Immunophilin FKBP12.6 Rotamase

UniProt:

P68107

Hormone Transport, Negative Regulation of Hormone Secretion, Negative Regulation of

### **Application Details**

#### Comment:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

**Transporter Activity** 

#### Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
