Datasheet for ABIN1459586 FABP3 Protein (AA 2-133) (His tag)

Go to Product page

# Overview

Target:

Alternative Name:

Quantity:	1 mg
Target:	FABP3
Protein Characteristics:	AA 2-133
Origin:	Cow
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This FABP3 protein is labelled with His tag.
Application:	ELISA
Product Details	
Sequence:	VDAFVGTWK LVDSKNFDDY MKSLGVGFAT RQVGNMTKPT TIIEVNGDTV IIKTQSTFKN
	TEISFKLGVE FDETTADDRK VKSIVTLDGG KLVHVQKWNG QETSLVREMV DGKLILTLTH
	GTAVCTRTYE KQA
Specificity:	Bos taurus (Bovine)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %
Target Details	

Fatty acid-binding protein, heart (FABP3) (FABP3 Products)

FABP3

### **Target Details**

Background:	Recommended name: Fatty acid-binding protein, heart.
	Alternative name(s): Fatty acid-binding protein 3 Heart-type fatty acid-binding protein.
	Short name= H-FABP Mammary-derived growth inhibitor.
	Short name= MDGI
UniProt:	P10790
Pathways:	Monocarboxylic Acid Catabolic Process

## **Application Details**

### Comment:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

## Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
