Datasheet for ABIN1461165

# CD13 Protein (AA 1-191) (His tag)

Go to Product page

## Overview

| | |
|---|---|
| Quantity: | 1 mg |
| Target: | CD13 (ANPEP) |
| Protein Characteristics: | AA 1-191 |
| Origin: | Dog |
| Source: | Yeast |
| Protein Type: | Recombinant |
| Purification tag / Conjugate: | This CD13 protein is labelled with His tag. |
| Application: | ELISA |

## Product Details

| | |
|---|---|
| Sequence: | DLSVIPVINR AQVIHDTFDL ASAQIVPVTL ALNSTLFLNQ ETEYMPWEAA LSSLSYFKLM FDRSEVYGPM KNYLRKQVTP LFNHFEKITQ NWTDHPQTLT EQYNEINAVS TACTYGVPKC KDLVSTLFAE WRKNPQNNPI YPNLRSTVYC NAIAQGGEEE WNFVWEQFRN TSLVNEADKL RSALACSTQV W |
| Specificity: | Canis familiaris (Dog) (Canis lupus familiaris) |
| Characteristics: | Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien cells or by baculovirus infection. Be aware about differences in price and lead time. |
| Purity: | > 90 % |

## Target Details

| | |
|---|---|
| Target: | CD13 (ANPEP) |

## Target Details

| | |
|---|---|
| Alternative Name: | Aminopeptidase N (ANPEP) (ANPEP Products) |
| Background: | Recommended name: Aminopeptidase N.<br>Short name= AP-N.<br>Short name= cAPN.<br>EC= 3.4.11.2.<br>Alternative name(s): Alanyl aminopeptidase Aminopeptidase M.<br>Short name= AP-M Microsomal aminopeptidase CD_antigen= CD13 |
| UniProt: | P79143 |
| Pathways: | Peptide Hormone Metabolism, Regulation of Systemic Arterial Blood Pressure by Hormones |

## Application Details

| | |
|---|---|
| Comment: | The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies. |
| Restrictions: | For Research Use only |

## Handling

| | |
|---|---|
| Format: | Lyophilized |
| Concentration: | 0.2-2 mg/mL |
| Buffer: | Tris-based buffer, 50 % glycerol |
| Handling Advice: | Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week |
| Storage: | -20 °C |
| Storage Comment: | Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C. |
