

Datasheet for ABIN1461220
LHB Protein (AA 18-138) (His tag)

[Go to Product page](#)

Overview

Quantity: 1 mg

Target: LHB

Protein Characteristics: AA 18-138

Origin: Dog

Source: Yeast

Protein Type: Recombinant

Purification tag / Conjugate: This LHB protein is labelled with His tag.

Application: ELISA

Product Details

Sequence: SRG PLRPLCRPIN ATLAAENEAC PVCITFTTTI CAGYCPSMVR VLPAALPPVP QPVCTYHELH
FASIRLPGCP PGVDPMVSFP VALSCRCGPC RLSNSDCGGP RAQSLACDRP LLPGLLFL

Specificity: Canis familiaris (Dog) (Canis lupus familiaris)

Characteristics: Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.

Purity: > 90 %

Target Details

Target: LHB

Alternative Name: Lutropin subunit beta (LHB) ([LHB Products](#))

Target Details

Target Type:	Hormone
Background:	Recommended name: Lutropin subunit beta. Alternative name(s): Luteinizing hormone subunit beta. Short name= LH-B. Short name= LSH-B. Short name= LSH-beta Lutropin beta chain
UniProt:	P18842
Pathways:	Metabolism of Steroid Hormones and Vitamin D , Peptide Hormone Metabolism , Hormone Activity , C21-Steroid Hormone Metabolic Process

Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modiflicated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
