GPX5 Protein (AA 22-221) (His tag)

### Overview Quantity: 1 mg Target: GPX5 Protein Characteristics: AA 22-221 Origin: Dog Source: Yeast Protein Type: Recombinant Purification tag / Conjugate: This GPX5 protein is labelled with His tag. Application: **ELISA Product Details** NAKPEKTKM DCYKDVKGTI YEYEALTLNG NERIQFKQYP RKHVLFVNVA TYCGLTAQYP Sequence: ELNSLQEELK PLGLVVLGFP CNQFGKQGPG ENSEILPGLK YVRPGRGYVP NFQLFEKGDV NGEKEQKVFT FLKLSCPHPS EVLGSFRHIS WDPVKVHDIR WNFEKFLVGP DGVPVLRWFH RTPISTVKED ILVYLKQLKM K Specificity: Canis familiaris (Dog) (Canis lupus familiaris) Characteristics: Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien cells or by baculovirus infection. Be aware about differences in price and lead time. Purity: > 90 % **Target Details**

GPX5

Target:

#### **Target Details**

Alternative Name:	Epididymal secretory glutathione peroxidase (GPX5) (GPX5 Products)
Background:	Recommended name: Epididymal secretory glutathione peroxidase.
	EC= 1.11.1.9.
	Alternative name(s): Epididymis-specific glutathione peroxidase-like protein.
	Short name= EGLP Glutathione peroxidase 5.
	Short name= GPx-5.
	Short name= GSHPx-5
UniProt:	046607
Pathways:	Thyroid Hormone Synthesis

#### **Application Details**

#### Comment:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

#### Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
