## Datasheet for ABIN1462219 HBQ1 Protein (AA 1-142) (His tag)

### Overview

Quantity:	1 mg
Target:	HBQ1
Protein Characteristics:	AA 1-142
Origin:	Horse
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This HBQ1 protein is labelled with His tag.
Application:	ELISA

### Product Details

Sequence:	MALAAADRAT VRALWKKMGS NVGVYATEAL ERMFLGFPST TTYFLHLDLS LGSTQVKAHG QKVADALTLA VEHLEDLPRA LSALRHRHVR ELRVDPASFQ LLGHCLLVTP ARHFPGDFSP TLHASLVKFL SHVISALASD CR
Specificity:	Equus caballus (Horse)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

### Target Details

Target:	HBQ1
Alternative Name:	Hemoglobin subunit theta-1 (HBQ1) ( <a href="#">HBQ1 Products</a> )

## Target Details

Background:	Recommended name: Hemoglobin subunit theta-1. Alternative name(s): Hemoglobin theta-1 chain Theta-1-globin
-------------	---

UniProt:	<a href="#">P06714</a>
----------	------------------------

## Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modiflicated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
----------	--

Restrictions:	For Research Use only
---------------	-----------------------

## Handling

Format:	Lyophilized
---------	-------------

Concentration:	0.2-2 mg/mL
----------------	-------------

Buffer:	Tris-based buffer, 50 % glycerol
---------	----------------------------------

Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
------------------	---

Storage:	-20 °C
----------	--------

Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
------------------	--
