RPS16 Protein (AA 1-148) (His tag)

Overview

Quantity:1 mgTarget:RPS16Protein Characteristics:AA 1-148Origin:Aedes aegyptiSource:YeastProtein Type:RecombinantPurification tag / Conjugate:This RPS16 protein is labelled with His tag.Application:ELISA	
Protein Characteristics: AA 1-148 Origin: Aedes aegypti Source: Yeast Protein Type: Recombinant Purification tag / Conjugate: This RPS16 protein is labelled with His tag.	
Origin: Aedes aegypti Source: Yeast Protein Type: Recombinant Purification tag / Conjugate: This RPS16 protein is labelled with His tag.	
Source: Yeast Protein Type: Recombinant Purification tag / Conjugate: This RPS16 protein is labelled with His tag.	
Protein Type: Recombinant Purification tag / Conjugate: This RPS16 protein is labelled with His tag.	
Purification tag / Conjugate: This RPS16 protein is labelled with His tag.	
Application: ELISA

Specificity: Aedes aegypti (Yellowfever mosquito) (Culex aegypti)	i, mammalien
Specificity: Aedes aegypti (Yellowfever mosquito) (Culex aegypti) Characteristics: Please inquire if you are interested in this recombinant protein expressed in E. col	e.
Characteristics: Please inquire if you are interested in this recombinant protein expressed in E. col	
Characteristics: Please inquire if you are interested in this recombinant protein expressed in E. col cells or by baculovirus infection. Be aware about differences in price and lead time	
Characteristics: Please inquire if you are interested in this recombinant protein expressed in E. colocells or by baculovirus infection. Be aware about differences in price and lead time. Purity: > 90 %	

Target Details

Background:	Recommended name: 40S ribosomal protein S16
UniProt:	P62251

Application Details

Comment:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
