

Datasheet for ABIN1472187 **AHCY Protein (AA 2-495) (His tag)**

Go to Product page

_					
	W	0	rv	10	W

Quantity:	1 mg
Target:	AHCY
Protein Characteristics:	AA 2-495
Origin:	Mycobacterium tuberculosis
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This AHCY protein is labelled with His tag.
Application:	ELISA

· ······		
Application:	ELISA	
Product Details		
Sequence:	TGNLVTKNS LTPDVRNGID FKIADLSLAD FGRKELRIAE HEMPGLMSLR REYAEVQPLK	
	GARISGSLHM TVQTAVLIET LTALGAEVRW ASCNIFSTQD HAAAAVVVGP HGTPDEPKGV

	NVNDSVTKSK FDNKYGTRHS LIDGINRGTD ALIGGKKVLI CGYGDVGKGC AEAMKGQGAR	
	VSVTEIDPIN ALQAMMEGFD VVTVEEAIGD ADIVVTATGN KDIIMLEHIK AMKDHAILGN	
	IGHFDNEIDM AGLERSGATR VNVKPQVDLW TFGDTGRSII VLSEGRLLNL GNATGHPSFV	
	MSNSFANQTI AQIELWTKND EYDNEVYRLP KHLDEKVARI HVEALGGHLT KLTKEQAEYL	
	GVDVEGPYKP DHYRY	
Specificity:	Mycobacterium tuberculosis	
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalier	
	cells or by baculovirus infection. Be aware about differences in price and lead time.	

Product Details Purity: > 90 % **Target Details AHCY** Target: Abstract: **AHCY Products** Background: Recommended name: Adenosylhomocysteinase. EC= 3.3.1.1. Alternative name(s): S-adenosyl-L-homocysteine hydrolase. Short name= AdoHcyase UniProt: P60176 **Application Details** Comment: The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies. Restrictions: For Research Use only

Handling

Format:	Lyophilized	
Concentration:	0.2-2 mg/mL	
Buffer:	Tris-based buffer, 50 % glycerol	
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week	
Storage:	-20 °C	

Storage Comment:

Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
