

Datasheet for ABIN1472721 **SEPHS2 Protein (AA 2-451) (His tag)**

Go to Product page

\sim					
	W	0	rv	10	W

Quantity:	1 mg
Target:	SEPHS2
Protein Characteristics:	AA 2-451
Origin:	Pig
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This SEPHS2 protein is labelled with His tag.
Application:	ELISA

Purification tag / Conjugate:	This SEPHS2 protein is labelled with His tag.		
Application:	ELISA		
Product Details			
Sequence:	AEAAATGAG GEMMAAVAAG EGCSGPAGLS LGRGFSGYRP FEPQALGLSP SWRLTGFSGM

	GRFGLLQGTS AETSGGLLIC LPREQAARFC SEIKSSKYGE GHQAWIVGIV EKGNRTARII		
	DKPRVIEVLP RGTAATALAP ENSSASSEPS L		
Specificity:	Sus scrofa (Pig)		
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien		
	cells or by baculovirus infection. Be aware about differences in price and lead time.		

Product Details > 90 % Purity: **Target Details** SEPHS2 Target: Alternative Name Selenide, water dikinase 2 (SEPHS2) (SEPHS2 Products) Background: Recommended name: Selenide, water dikinase 2. EC= 2.7.9.3. Alternative name(s): Selenium donor protein 2 Selenophosphate synthase 2 UniProt: A1YIZ1 **Application Details** Comment: The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies. Restrictions: For Research Use only Handling Format: Lyophilized Concentration: 0.2-2 mg/mL Buffer: Tris-based buffer, 50 % glycerol Handling Advice: Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to

Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.

one week

-20 °C
