MYL1 Protein (AA 2-192) (His tag)

Go to Product page

Overview Quantity: 1 mg Target: MYL1 Protein Characteristics: AA 2-192 Origin: Rabbit Source: Yeast Protein Type: Recombinant Purification tag / Conjugate: This MYL1 protein is labelled with His tag. Application: **ELISA Product Details** APKKDVKKP AAAAAPAPAP APAPAPAPAK PKEEKIDLSA IKIEFSKEQQ DEFKEAFLLY Sequence: DRTGDSKITL SQVGDVLRAL GTNPTNAEVK KVLGNPSNEE MNAKKIEFEQ FLPMLQAISN NKDQGTYEDF VEGLRVFDKE GNGTVMGAEL RHVLATLGEK MKEEEVEALM AGQEDSNGCI NYEAFVKHIM SI Specificity: Oryctolagus cuniculus (Rabbit) Characteristics: Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien cells or by baculovirus infection. Be aware about differences in price and lead time. Purity: > 90 % **Target Details** MYL1 Target:

Target Details

Alternative Name:	Myosin light chain 1/3, skeletal muscle isoform (MYL1) (MYL1 Products)
Background:	Recommended name: Myosin light chain 1/3, skeletal muscle isoform.
	Short name= MLC1/MLC3.
	Short name= MLC1F/MLC3F.
	Alternative name(s): Myosin light chain alkali 1/2.
	Short name= Myosin light chain A1/A2
UniProt:	P02602

Application Details

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
