

# Datasheet for ABIN1473468 **S100A12 Protein (AA 2-92) (His tag)**

Go to Product page

	er		

Overview	
Quantity:	1 mg
Target:	S100A12
Protein Characteristics:	AA 2-92
Origin:	Rabbit
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This S100A12 protein is labelled with His tag.
Application:	ELISA
Product Details	
Sequence:	TKLEDHLEG IINIFHQYSV RTGHYDTLSK CELKKLITTE LVNTIKNTKD QATVDRIFRD
	LDEDGDHQVD FKEFLSLLAS VLVTAHENIH KE
Specificity:	Oryctolagus cuniculus (Rabbit)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %
Target Details	
Target:	S100A12
Alternative Name:	Protein S100-A12 (S100A12) (S100A12 Products)

#### **Target Details**

Background:	Recommended name: Protein S100-A12.
	Alternative name(s): Calgranulin-C.
	Short name= CAGC Extracellular newly identified RAGE-binding protein.
	Short name= EN-RAGE S100 calcium-binding protein A12
UniProt:	077791
Pathways:	Toll-Like Receptors Cascades, S100 Proteins

## **Application Details**

#### Comment:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

## Handling

Format:	Lyophilized	
Concentration:	0.2-2 mg/mL	
Buffer:	Tris-based buffer, 50 % glycerol	
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week	
Storage:	-20 °C	
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
