Datasheet for ABIN1474397

**CRIP2 Protein (AA 1-208) (His tag)**

## Overview

Quantity:	1 mg
Target:	CRIP2
Protein Characteristics:	AA 1-208
Origin:	Rat
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This CRIP2 protein is labelled with His tag.
Application:	ELISA

## Product Details

Sequence:	MASKCPKCDK TVYFAEKVSS LGKDWHKFCL KCERCNKTLT PGGHAEHDGK PFCHKPCYAT LFGPKG VNIG GAGSYIEKP PTEAPQVTGP IEVPVVRTEE RKTSGPPKGP SKASSVTFTT GEPNMCPRCN KRVYFAEKVT SLGKDWHRPC LRCERCSKTL TPGGHAHDG QPYCHKPCYG ILFGPKG VNT GAVGSYIYDK DPEGTVQP
Specificity:	Rattus norvegicus (Rat)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

## Target Details

Target:	CRIP2
---------	-------

## Target Details

Abstract: [CRIP2 Products](#)

Background: Recommended name: Cysteine-rich protein 2.  
Short name= CRP-2.  
Alternative name(s): Protein ESP1

UniProt: [P36201](#)

## Application Details

Comment: The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modiflicated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions: For Research Use only

## Handling

Format: Lyophilized

Concentration: 0.2-2 mg/mL

Buffer: Tris-based buffer, 50 % glycerol

Handling Advice: Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week

Storage: -20 °C

Storage Comment: Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
