Datasheet for ABIN1474458
KLK1C7 Protein (AA 25-261) (His tag)

Overview

Quantity:	1 mg
Target:	KLK1C7
Protein Characteristics:	AA 25-261
Origin:	Rat
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This KLK1C7 protein is labelled with His tag.
Application:	ELISA

Target Details

Alternative Name:	Glandular kallikrein-7, submandibular/renal (Klk7) (KLK1C7 Products)
Background:	Recommended name: Glandular kallikrein-7, submandibular/renal. Short name= rGK-7. EC= 3.4.21.35. Alternative name(s): Esterase B Kallikrein-related protein K1 Proteinase A RSKG-7 Tissue kallikrein
UniProt:	P36373

Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
