Quantity:	1 mg
Target:	Glutathione Synthetase (GSS)
Protein Characteristics:	AA 2-474
Origin:	Rat
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This Glutathione Synthetase protein is labelled with His tag.
Application:	ELISA

Product Details	
Sequence:	ATSWGSILQ DEKQLEELAQ QAIDRALAEG VLLRSAKNPS SSDVVTYAPF TLFPSPVPST
	LLEQAYAVQM DFNILVDAVS QNSAFLEQTL SSTIKKDEYT ARLFDIYKQV LKEGIAQTVF

	QCISELGIFG VYVRQGTTLV MNKHVGHLLR TKAIEHADGG VAAGVAVLDN PYPV
Specificity:	Rattus norvegicus (Rat)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.

Product Details Purity: > 90 % **Target Details** Target: Glutathione Synthetase (GSS) Abstract: **GSS Products** Background: Recommended name: Glutathione synthetase. Short name= GSH synthetase. Short name= GSH-S. EC= 6.3.2.3. Alternative name(s): Glutathione synthase UniProt: P46413 Pathways: Warburg Effect **Application Details** Comment: The yeast protein expression system is the most economical and efficient eukaryotic system of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system native protein conformation. It can be used to produce protein material with high added value

for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions: For Research Use only

Handling

Format:	Lyophilized	
Concentration:	0.2-2 mg/mL	
Buffer:	Tris-based buffer, 50 % glycerol	
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week	

Handling

Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
