antibodies

Datasheet for ABIN1474787 CDKN2B Protein (AA 1-130) (His tag)

Overview	
Quantity:	1 mg
Target:	CDKN2B
Protein Characteristics:	AA 1-130
Origin:	Rat
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This CDKN2B protein is labelled with His tag.
Application:	ELISA
Product Details	
Sequence:	MLGGGSDAGL ATAAARGQVE TVRQLLEAGA DPNAVNRFGR RPIQVMMMGS AQVAELLLLH GAEPNCADPA TLTRPVHDAA REGFLDTLMV LHKAGARLDV CDAWGRLPVD LAEEQGHRDI ARYLHAATGD
Specificity:	Rattus norvegicus (Rat)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %
Target Details	
Target:	CDKN2B
Alternative Name:	Cyclin-dependent kinase 4 inhibitor B (Cdkn2b) (CDKN2B Products)

Target Details	
Background:	Recommended name: Cyclin-dependent kinase 4 inhibitor B. Alternative name(s): p14-INK4b p15-INK4b
UniProt:	P55272
Pathways:	Cell Division Cycle, Mitotic G1-G1/S Phases
Application Details	

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system
	for secretion and intracellular expression. A protein expressed by the mammalian cell system is
	of very high-quality and close to the natural protein. But the low expression level, the high cost
	of medium and the culture conditions restrict the promotion of mammalian cell expression
	systems. The yeast protein expression system serve as a eukaryotic system integrate the
	advantages of the mammalian cell expression system. A protein expressed by yeast system
	could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the
	native protein conformation. It can be used to produce protein material with high added value
	that is very close to the natural protein. Our proteins produced by yeast expression system has
	been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
