1 mg
PDX1
AA 1-283
Rat
Yeast
Recombinant
This PDX1 protein is labelled with His tag.
ELISA

Product Details	
Sequence:	MNSEEQYYAA TQLYKDPCAF QRGPVPEFSA NPPACLYMGR QPPPPPPPQF AGSLGTLEQG
	SPPDISPYEV PPLADDPAGA HLHHHLPAQL GLAHPPPGPF PNGTETGGLE EPSRVHLPFP
	WMKSTKAHAW KSQWAGGAYA AEPEENKRTR TAYTRAQLLE LEKEFLFNKY ISRPRRVELA
	VMLNLTERHI KIWFQNRRMK WKKEEDKKRS SGTTSGGGGG EEPEQDCAVT SGEELLALPP
	PPPPGGAVPS GVPAAAREGR LPSGLSASPQ PSSIAPLRPQ EPR
Specificity:	Rattus norvegicus (Rat)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	PDX1	
Alternative Name:	Pancreas/duodenum homeobox protein 1 (Pdx1) (PDX1 Products)	
Background:	Recommended name: Pancreas/duodenum homeobox protein 1. Alternative name(s): Insulin promoter factor 1. Short name= IPF-1 Islet/duodenum homeobox 1. Short name= IDX-1 Somatostatin-transactivating factor 1. Short name= STF-1	
UniProt:	P52947	
Pathways:	Nuclear Receptor Transcription Pathway, Positive Regulation of Peptide Hormone Secretion, Steroid Hormone Mediated Signaling Pathway, Hormone Transport, Carbohydrate Homeostasis, Chromatin Binding, Maintenance of Protein Location	

Application Details

Comment:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

Format:	Lyophilized	
Concentration:	0.2-2 mg/mL	
Buffer:	Tris-based buffer, 50 % glycerol	
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week	
Storage:	-20 °C	

Storage Comment:

Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
