## PCCB Protein (AA 29-541) (His tag)

Go to Product page

( )	1/0	r\ /1	014	
( )	ve	I V I	-v	V

Quantity:	1 mg
Target:	PCCB
Protein Characteristics:	AA 29-541
Origin:	Rat
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This PCCB protein is labelled with His tag.
Application:	ELISA

Product Details	
Sequence:	SL CSQPVSVNER IENKRHAALL GGGQRRIDAQ HKRGKLTARE RISLLLDPGS FLESDMFVEH
	RCADFGMAAE KNKFPGDSVV TGRGRINGRL VYVFSQDFTV FGGSLSGAHA QKICKIMDQA

	GDTNYAWPTA EIAVMGAKGA VEIIFKGHED VEAAQAEYVE KFANPFPAAV RGFVDDIIQP
	SSTRARICCD LEVLASKKVH RPWRKHANVP L
Specificity:	Rattus norvegicus (Rat)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien

cells or by baculovirus infection. Be aware about differences in price and lead time.

# **Product Details** > 90 % Purity: **Target Details** Target: **PCCB** Propionyl-CoA carboxylase beta chain, mitochondrial (Pccb) (PCCB Products) Alternative Name Background: Recommended name: Propionyl-CoA carboxylase beta chain, mitochondrial. Short name= PCCase subunit beta. EC= 6.4.1.3. Alternative name(s): Propanoyl-CoA:carbon dioxide ligase subunit beta UniProt: P07633 Pathways: Monocarboxylic Acid Catabolic Process **Application Details** Comment: The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions: For Research Use only

#### Handling

Format:	Lyophilized	
Concentration:	0.2-2 mg/mL	
Buffer:	Tris-based buffer, 50 % glycerol	
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week	

### Handling

Storage:	-20 °C
Storage Comment: Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
