antibodies

## Datasheet for ABIN1475636 LGALS3BP Protein (AA 19-574) (His tag)

Overview

Image

| Quantity:                     | 1 mg  |  |
|-------------------------------|---|--|
| Target:                       | LGALS3BP  |  |
| Protein Characteristics:      | AA 19-574                                       |  |
| Origin:                       | Rat   |  |
| Source:                       | Yeast   |  |
| Protein Type:                 | Recombinant                                     |  |
| Purification tag / Conjugate: | This LGALS3BP protein is labelled with His tag. |  |
| Application:                  | ELISA   |  |

| Purity:             | > 90 %   |  |  |  |
| Target Details      |  |  |  |  |
| Target:             | LGALS3BP   |  |  |  |
| Alternative Name:   | Galectin-3-binding protein (Lgals3bp) (LGALS3BP Products)  |  |  |  |
| Background:         | Recommended name: Galectin-3-binding protein.  |  |  |  |
|                     | Alternative name(s): Cyp-C-associated protein.   |  |  |  |
|                     | Short name= CyCAP Lectin galactoside-binding soluble 3-binding protein Mac-2-binding protein.      |  |  |  |
|                     | Short name= MAC2BP.  |  |  |  |
|                     | Short name= Mac-2 BP Protein 90K   |  |  |  |
| UniProt:            | 070513   |  |  |  |
| Application Details |  |  |  |  |
| Comment:            | The yeast protein expression system is the most economical and efficient eukaryotic system         |  |  |  |
|                     | for secretion and intracellular expression. A protein expressed by the mammalian cell system is    |  |  |  |
|                     | of very high-quality and close to the natural protein. But the low expression level, the high cost |  |  |  |
|                     | of medium and the culture conditions restrict the promotion of mammalian cell expression           |  |  |  |
|                     | systems. The yeast protein expression system serve as a eukaryotic system integrate the            |  |  |  |
|                     | advantages of the mammalian cell expression system. A protein expressed by yeast system            |  |  |  |
|                     | could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the     |  |  |  |
|                     | native protein conformation. It can be used to produce protein material with high added value      |  |  |  |
|                     | that is very close to the natural protein. Our proteins produced by yeast expression system has    |  |  |  |
|                     | been used as raw materials for downstream preparation of monoclonal antibodies.                    |  |  |  |

Restrictions:

For Research Use only

## Handling

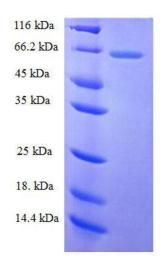

| Format:          | Lyophilized   |
|------------------|---|
| Concentration:   | 0.2-2 mg/mL   |
| Buffer:          | Tris-based buffer, 50 % glycerol  |
| Handling Advice: | Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week |
