Datasheet for ABIN1475667 Embigin Protein (EMB) (AA 34-264) (His tag)

| Overview | |
|-------------------------------|--------------------------------------------------------------------------------------------------|
| Quantity: | 1 mg |
| Target: | Embigin (EMB) |
| Protein Characteristics: | AA 34-264 |
| Origin: | Rat |
| Source: | Yeast |
| Protein Type: | Recombinant |
| Purification tag / Conjugate: | This Embigin protein is labelled with His tag. |
| Application: | ELISA |
| Product Details | |
| Sequence: | DPADSAF TSLPVREEMM AKYANLSLET YNISLTEQTR VSEQNITLER PSHLELECTF |
| | TATEDVMSMN VTWKKDDALL ETTDGFNTTK MGDTLYSQYR FTVFNSKQMG KYSCFLGEEL |
| | RGTFNIRVPK VHGKNKPLIT YVGDSTVLKC ECQNCLPLNW TWYMSNGTAQ VPIDVHVNDK |
| | FDINGSYANE TKLKVKHLLE EDGGSYWCRA AFPLGESEEH IKLVVLSFMV PLKP |
| Specificity: | Rattus norvegicus (Rat) |
| Characteristics: | Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien |

cells or by baculovirus infection. Be aware about differences in price and lead time.

| Target Details | |
|----------------|---------------------------|
| Abstract: | EMB Products |
| Background: | Recommended name: Embigin |
| UniProt: | 088775 |

Application Details

| Comment: | The yeast protein expression system is the most economical and efficient eukaryotic system |
|----------|----------------------------------------------------------------------------------------------------|
| | for secretion and intracellular expression. A protein expressed by the mammalian cell system is |
| | of very high-quality and close to the natural protein. But the low expression level, the high cost |
| | of medium and the culture conditions restrict the promotion of mammalian cell expression |
| | systems. The yeast protein expression system serve as a eukaryotic system integrate the |
| | advantages of the mammalian cell expression system. A protein expressed by yeast system |
| | could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the |
| | native protein conformation. It can be used to produce protein material with high added value |
| | that is very close to the natural protein. Our proteins produced by yeast expression system has |
| | been used as raw materials for downstream preparation of monoclonal antibodies. |

Restrictions:

For Research Use only

Handling

| Format: | Lyophilized |
|------------------|-----------------------------------------------------------------------------------------------------|
| Concentration: | 0.2-2 mg/mL |
| Buffer: | Tris-based buffer, 50 % glycerol |
| Handling Advice: | Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week |
| Storage: | -20 °C |
| Storage Comment: | Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C. |
