CRABP2 Protein (AA 2-138) (His tag)

Go to Product page

\sim			
	N/P	r\/	i⊢₩

Quantity:	1 mg
Target:	CRABP2
Protein Characteristics:	AA 2-138
Origin:	Xenopus laevis
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This CRABP2 protein is labelled with His tag.
Application:	ELISA
Product Details	
Sequence:	PNFSGHWKM KQSENFEEML KALGVNLMLR KIAVAAASKP AVEIKQEGET FYIKTSTTVR
	TTEINFKIGE EFDEQTVDGR PCKSLAKWVS ENKMACEQKL LKGDGPKTAW TREMTNDGEL
	ILTMTADDVV CTRIYIRD
Specificity:	Xenopus laevis (African clawed frog)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %
Target Details	

Target:	CRABP2
Alternative Name:	Cellular retinoic acid-binding protein 2 (crabp2) (CRABP2 Products)

Target Details

Background:
Recommended name: Cellular retinoic acid-binding protein 2.

Alternative name(s): Cellular retinoic acid-binding protein.

Short name= CRABP.

Short name= xCRABP.

Short name= xCRABP-b

Application Details

Comment:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

Format:	Lyophilized	
Concentration:	0.2-2 mg/mL	
Buffer:	Tris-based buffer, 50 % glycerol	
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week	
Storage:	-20 °C	
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
