Quantity:	1 mg
Target:	Retinoic Acid Receptor alpha (RARA)
Protein Characteristics:	AA 1-458
Origin:	Xenopus laevis
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This Retinoic Acid Receptor alpha protein is labelled with His tag.
Application:	ELISA

Product Details	
Sequence:	MSSKDNTCPP PGPGHINGFH VPHYAFFFPH MLGGMSXTGG LPGVQHQPPL SGYSTPSPAT
	IETQSTSSEE IVPSPPTPPP LPRIYKPCFV CQDKSSGYHY GVSACEGCKG FFRRSIQKNM

	GFGPLTDLVF AFANQPVPLE MDDAETGLLS AICLICGDRQ DLEQPDKVDK LQEPLLEALK
	IYVRTRRPQK PHMFPKMLMK ITDLRTVSAK GAERVITLKM EIPGAMPLIQ EMLENSEGLD
	TLGGGASSDA PVTPVAPGSC SPSLSPSSTH SSPSTHSP
Specificity:	Xenopus laevis (African clawed frog)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.

### **Product Details** > 90 % Purity: **Target Details** Target: Retinoic Acid Receptor alpha (RARA) Alternative Name Retinoic acid receptor alpha (rara) (RARA Products) Background: Recommended name: Retinoic acid receptor alpha. Short name= RAR-alpha. Alternative name(s): Nuclear receptor subfamily 1 group B member 1 UniProt: P51126 Pathways: Nuclear Receptor Transcription Pathway, Retinoic Acid Receptor Signaling Pathway, Intracellular Steroid Hormone Receptor Signaling Pathway, Steroid Hormone Mediated Signaling Pathway, Cellular Response to Molecule of Bacterial Origin, Positive Regulation of Immune Effector Process, S100 Proteins **Application Details** Comment: The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies. Restrictions: For Research Use only Handling

# Format: Lyophilized Concentration: 0.2-2 mg/mL Buffer: Tris-based buffer, 50 % glycerol Handling Advice: Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to

#### Handling

	one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
