

Datasheet for ABIN1477653 UBE2I Protein (AA 1-158) (His tag)

Overview Quantity: 1 mg UBE2I Target: Protein Characteristics: AA 1-158 Origin: Xenopus laevis Yeast Source: Protein Type: Recombinant Purification tag / Conjugate: This UBE2I protein is labelled with His tag. Application: ELISA **Product Details** Sequence: MSGIALSRLA QERKAWRKDH PFGFVAVPTK NPDGTMNLMN WECAIPGKKG TPWEGGLFKL RMLFKDDYPS SPPKCKFEPP LFHPNVYPSG TVCLSILEED KDWRPAITIK QILLGIQELL NEPNIQDPAQ AEAYTIYCQN RVEYEKRVRA QAKKFAPS Specificity: Xenopus laevis (African clawed frog) Characteristics: Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien cells or by baculovirus infection. Be aware about differences in price and lead time. Purity: > 90 % **Target Details** UBE2I Target: Alternative Name: SUMO-conjugating enzyme UBC9 (ube2i) (UBE2I Products)

Target Details	
Background:	Recommended name: SUMO-conjugating enzyme UBC9. EC= 6.3.2
	Alternative name(s): SUMO-protein ligase Ubiquitin carrier protein 9 Ubiquitin carrier protein I
	Ubiquitin-conjugating enzyme E2 I Ubiquitin-protein ligase I
UniProt:	P63282
Pathways:	Intracellular Steroid Hormone Receptor Signaling Pathway, Regulation of Intracellular Steroid
	Hormone Receptor Signaling, Ubiquitin Proteasome Pathway

Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system
	for secretion and intracellular expression. A protein expressed by the mammalian cell system is
	of very high-quality and close to the natural protein. But the low expression level, the high cost
	of medium and the culture conditions restrict the promotion of mammalian cell expression
	systems. The yeast protein expression system serve as a eukaryotic system integrate the
	advantages of the mammalian cell expression system. A protein expressed by yeast system
	could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the
	native protein conformation. It can be used to produce protein material with high added value
	that is very close to the natural protein. Our proteins produced by yeast expression system has
	been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
