## Datasheet for ABIN1477655

## **SNRPF Protein (AA 1-86) (His tag)**

## Overview Quantity: 1 mg **SNRPF** Target: Protein Characteristics: AA 1-86 Origin: Xenopus laevis Source: Yeast Protein Type: Recombinant Purification tag / Conjugate: This SNRPF protein is labelled with His tag. Application: **ELISA Product Details** MSLPLNPKPF LNGLTGKPVM VKLKWGMEYK GYLVSVDGYM NMQLANTEEY IDGALSGHLG Sequence: EVLIRCNNVL YIRGVEEEEE DGEMRE Specificity: Xenopus laevis (African clawed frog) Characteristics: Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien cells or by baculovirus infection. Be aware about differences in price and lead time. Purity: > 90 % **Target Details SNRPF** Target: Alternative Name: Small nuclear ribonucleoprotein F (snrpf) (SNRPF Products)

#### **Target Details**

Background:	Recommended name: Small nuclear ribonucleoprotein F.
	Short name= snRNP-F.
	Alternative name(s): Sm protein F.
	Short name= Sm-F.
	Short name= SmF
UniProt:	P62321
Pathways:	Ribonucleoprotein Complex Subunit Organization

### **Application Details**

#### Comment:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

#### Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
