Datasheet for ABIN1477857

# POLR3K Protein (AA 1-110) (His tag)

Go to Product page

## Overview

| | |
|---|---|
| Quantity: | 1 mg |
| Target: | POLR3K |
| Protein Characteristics: | AA 1-110 |
| Origin: | Saccharomyces cerevisiae |
| Source: | Yeast |
| Protein Type: | Recombinant |
| Purification tag / Conjugate: | This POLR3K protein is labelled with His tag. |
| Application: | ELISA |

## Product Details

| | |
|---|---|
| Sequence: | MLSFCPSCNN MLLITSGDSG VYTLACRSCP YEFPIEGIEI YDRKKLPRKE VDDVLGGGWD NVDQTKTQCP NYDTCGGESA YFFQLQIRSA DEPMTTFYKC VNCGHRWKEN |
| Specificity: | Saccharomyces cerevisiae (strain ATCC 204508 / S288c) (Bakers yeast) |
| Characteristics: | Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien cells or by baculovirus infection. Be aware about differences in price and lead time. |
| Purity: | > 90 % |

## Target Details

| | |
|---|---|
| Target: | POLR3K |
| Alternative Name: | DNA-directed RNA polymerase III subunit RPC10 (RPC11) (POLR3K Products) |

## Target Details

| | |
|---|---|
| Background: | Recommended name: DNA-directed RNA polymerase III subunit RPC10.<br>Short name= RNA polymerase III subunit C10.<br>Alternative name(s): DNA-directed RNA polymerases III 12.5 kDa polypeptide RNA polymerase III subunit C11 |
| UniProt: | Q04307 |

## Application Details

| | |
|---|---|
| Comment: | The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies. |
| Restrictions: | For Research Use only |

## Handling

| | |
|---|---|
| Format: | Lyophilized |
| Concentration: | 0.2-2 mg/mL |
| Buffer: | Tris-based buffer, 50 % glycerol |
| Handling Advice: | Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week |
| Storage: | -20 °C |
| Storage Comment: | Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C. |
