

Datasheet for ABIN1477917 PRPF4 Protein (AA 1-465) (His tag)

Go to Product page

_					
	W	0	rv	10	W

Quantity:	1 mg
Target:	PRPF4
Protein Characteristics:	AA 1-465
Origin:	Saccharomyces cerevisiae
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This PRPF4 protein is labelled with His tag.
Application:	ELISA

ou are interested in this recombinant protein expressed in E. coli, mammalien

Product Details > 90 % Purity: **Target Details** PRPF4 Target: U4/U6 small nuclear ribonucleoprotein PRP4 (PRP4) (PRPF4 Products) Alternative Name Background: Recommended name: U4/U6 small nuclear ribonucleoprotein PRP4. Alternative name(s): Pre-mRNA-processing protein 4 UniProt: P20053 **Application Details** The yeast protein expression system is the most economical and efficient eukaryotic system Comment: for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies. Restrictions: For Research Use only Handling Format: Lyophilized Concentration: 0.2-2 mg/mL Buffer: Tris-based buffer, 50 % glycerol Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to Handling Advice:

Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.

one week

-20 °C
