Datasheet for ABIN1478011  
**RPL10 Protein (AA 2-221) (His tag)**

## Overview

Quantity:	1 mg
Target:	RPL10
Protein Characteristics:	AA 2-221
Origin:	Saccharomyces cerevisiae
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This RPL10 protein is labelled with His tag.
Application:	ELISA

## Product Details

Sequence:	ARRPARCYR YQKNKPYPKS RYNRAVPDSK IRIYDLGKKK ATVDEFPLCV HLVSNELEQL SSEALEAARI CANKYMTTVS GRDAFHLRVR VHPFHVLRIN KMLSCAGADR LQQGMRGAWG KPHGLAARVD IGQIIFSVRT KDSNKDVVVE GLRRARYKFP GQKILSKK WGFTNLDRPE YLKKREAGEV KDDGAFVKFL SKKGSLENNI REFPEYFAAQ A
Specificity:	Saccharomyces cerevisiae (strain ATCC 204508 / S288c) (Bakers yeast)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

## Target Details

Target:	RPL10
---------	-------

## Target Details

---

Alternative Name:	60S ribosomal protein L10 (RPL10) ( <a href="#">RPL10 Products</a> )
Background:	Recommended name: 60S ribosomal protein L10. Alternative name(s): L9 Ubiquinol-cytochrome C reductase complex subunit VI-requiring protein
UniProt:	<a href="#">P41805</a>

## Application Details

---

Comment:	<p>The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.</p>
----------	---

Restrictions:	For Research Use only
---------------	-----------------------

## Handling

---

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
