## Casein Kinase II Subunit beta (Ckb1) (AA 2-278) protein (His tag)

[Go to Product page](#)

### Overview

Quantity:	1 mg
Target:	Casein Kinase II Subunit beta (Ckb1)
Protein Characteristics:	AA 2-278
Origin:	Saccharomyces cerevisiae
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	His tag
Application:	ELISA

### Product Details

Sequence:	SQEFVEDYS RTGSSDDEDS GAYDEWIPSF CSRFGHEYFC QVPTEFIEDD FNMTSLSQEV PHYRKALDLI LDLEAMSDEE EDEDDVVEED EVDQEMQSND GHDEGKRRNK SPVVNKSIIIE HAAEQLYGLI HARFILTKPG LQAMA EKFDH KEFGTCPRYY CNGMQLLPCG LSDTVGKHTV RLYCPCQDL YLPQSSRFLC LEGAFWGTSF PGVFLKHFKE LEEYVERKSK ESYELKVFGF RINDEAVSGP RMKWLRQYPS TEEDWEEFAK CEFETPAV
Specificity:	Saccharomyces cerevisiae (strain ATCC 204508 / S288c) (Bakers yeast)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

## Target Details

---

Target:	Casein Kinase II Subunit beta (Ckb1)
Abstract:	<a href="#">Ckb1 Products</a>
Background:	Recommended name: Casein kinase II subunit beta. Short name= CK II beta
UniProt:	<a href="#">P43639</a>

## Application Details

---

Comment:	<p>The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.</p>
Restrictions:	For Research Use only

## Handling

---

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
