

Datasheet for ABIN1478145 **EXOSC2 Protein (AA 2-359) (His tag)**

Go to Product page

_					
	W	0	rv	10	W

Quantity:	1 mg	
Target:	EXOSC2	
Protein Characteristics:	AA 2-359	
Origin:	Saccharomyces cerevisiae	
Source:	Yeast	
Protein Type:	Recombinant	
Purification tag / Conjugate:	This EXOSC2 protein is labelled with His tag.	
Application:	ELISA	
Product Details		
Sequence:	SEVITITKR NGAFQNSSNL SYNNTGISDD ENDEEDIYMH DVNSASKSES DSQIVTPGEL

Target Details

Target:	EXOSC2	
Alternative Name:	Exosome complex component RRP4 (RRP4) (EXOSC2 Products)	
Background:	Recommended name: Exosome complex component RRP4. Alternative name(s): Ribosomal RNA-processing protein 4	
UniProt:	P38792	
Pathways:	SARS-CoV-2 Protein Interactome	

Application Details

Comment:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

Format:	Lyophilized	
Concentration:	0.2-2 mg/mL	
Buffer:	Tris-based buffer, 50 % glycerol	
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week	
Storage:	-20 °C	
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
