## Mitochondrially Encoded ATP Synthase 8 (MT-ATP8) (AA 1-53) protein (His tag)

### Overview

Quantity: 1 mg

Target: Mitochondrially Encoded ATP Synthase 8 (MT-ATP8)

Protein Characteristics: AA 1-53

Origin: Alligator

Source: Yeast

Protein Type: Recombinant

Purification tag / Conjugate: His tag

Application: ELISA

### Product Details

Sequence: MPQLNPEPWL TTFLIVWISL IVILQPKIAS LMLTSSPTPY KAMTIKTWPW PWT

Specificity: Alligator mississippiensis (American alligator)

Characteristics: Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.

Purity: > 90 %

### Target Details

Target: Mitochondrially Encoded ATP Synthase 8 (MT-ATP8)

Alternative Name: ATP synthase protein 8 (MT-ATP8) ([MT-ATP8 Products](#))

Background: Recommended name: ATP synthase protein 8.

## Target Details

---

Alternative name(s): A6L F-ATPase subunit 8

UniProt: [O47871](#)

Pathways: [Proton Transport](#), [Ribonucleoside Biosynthetic Process](#)

## Application Details

---

**Comment:** The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

**Restrictions:** For Research Use only

## Handling

---

**Format:** Lyophilized

**Concentration:** 0.2-2 mg/mL

**Buffer:** Tris-based buffer, 50 % glycerol

**Handling Advice:** Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week

**Storage:** -20 °C

**Storage Comment:** Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
