Quantity: 1 mg Target: YUAC Protein Characteristics: AA 1-180 Origin: Bacillus subtilis Source: Yeast Protein Type: Recombinant Purification tag / Conjugate: This YUAC protein is labelled with His tag. Application: ELISA Product Details Sequence: MDENPEFAAI EQARDLVIDS IAETMDLYGI TRSVGILYGT MYMRDEMTLD EMREELQMSK PSMSTGVKKL QDLNVVKKTF HRGIRKHTFV AEKDFFKFFT NFFPPKWERE VQVNVTAIEE AQADLQKVLC KEDLDEDIKN EALQLYDQLE SSKAYYDWLK RLAESVQTGE IFKFIPVETK Specificity: Bacillus subtilis (strain 168) Characteristics: Please inquire if you are interested in this recombinant protein expressed in E. coli, mamm cells or by baculovirus infection. Be aware about differences in price and lead time. Purity: > 90 % Target YUAC Alternative Name: Uncharacterized protein yuaC (yuaC) (YUAC Products)		
Protein Characteristics: AA 1-180 Origin: Bacillus subtilis Source: Yeast Protein Type: Recombinant Purification tag / Conjugate: This YUAC protein is labelled with His tag. cells or by baculovirus infection. Be aware about differences in price and lead time. Purity: > 90 % Target Details Target: YUAC	Specificity:	Bacillus subtilis (strain 168)
Purity: > 90 % Target Details Target: YUAC	Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
Target Details Target: YUAC		cells or by baculovirus infection. Be aware about differences in price and lead time.
Target: YUAC	Purity:	> 90 %
	Target Details	
Alternative Name: Uncharacterized protein yuaC (yuaC) (YUAC Products)	Target:	YUAC
	Alternative Name:	Uncharacterized protein yuaC (yuaC) (YUAC Products)

Target Details

Background:	Recommended name: Uncharacterized protein yuaC.
	Alternative name(s): ORF2
UniProt:	P71015

Application Details

Comment:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
