COPS2 Protein (AA 1-495) (His tag)

Go to Product page

Overview

Quantity:	1 mg
Target:	COPS2
Protein Characteristics:	AA 1-495
Origin:	C. elegans
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This COPS2 protein is labelled with His tag.
Application:	ELISA

Product Details	
Sequence:	MGDEYMDDDE DYGFEYEDDS GSEPDVDMEN QYYTAKGLRS DGKLDEAIKS FEKVLELEGE

	TSLVVPNAGD QGTTKSDSKP GTSSEPSTTT SVTSSILQGP PATSSCHQEL SMDGLRVWAE
	RIDSIQSNIG TRIKF
Specificity:	Caenorhabditis elegans
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien

cells or by baculovirus infection. Be aware about differences in price and lead time.

Product Details > 90 % Purity: **Target Details** COPS2 Target: COP9 signalosome complex subunit 2 (csn-2) (COPS2 Products) Alternative Name Background: Recommended name: COP9 signalosome complex subunit 2. Short name= Signalosome subunit 2 UniProt: 001422 Pathways: Cell Division Cycle **Application Details** Comment: The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies. Restrictions: For Research Use only Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
