Datasheet for ABIN1506203

Casein Kinase II Subunit beta (Ckb1) (AA 1-294) protein (His tag)

Overview

Quantity:	1 mg
Target:	Casein Kinase II Subunit beta (Ckb1)
Protein Characteristics:	AA 1-294
Origin:	Candida albicans
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	His tag
Application:	ELISA

Product Details

Sequence:	MPSDPEEDI PWIQLCELF GHDFVQVSQ DFIEDDFNLT GLSSQVPYYR EALYTILDYQ VETAEDHNTD NTTTTNSNNN DSRNGTSKRN ASELPNKALL AHSANELLYGL IHARYIVSKQ GLTAMASKFE RNDFGSCPXY FCDGMHLIPV GSTDVPQGQET VRLFCPCND IYIPSSRYL NIDGAFFGTT FPGLLVKMFP EIENQCRIRI TKFSQNDFGL KLFQFKINEL SATGPRMKWL RMHPETEGER QELTHVNIMF QLATYMKTKR MEEDDEEEED EEEEEDDRT MASE
Specificity:	Candida albicans (Yeast)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	Casein Kinase II Subunit beta (Ckb1)
Abstract:	Ckb1 Products
Background:	Recommended name: Casein kinase II subunit beta. Short name= CK II beta
UniProt:	O59906

Application Details

Comment:	<p>The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.</p>
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
