Datasheet for ABIN1508701

HUP Protein (AA 1-214) (His tag)

Go to Product page

Overview

Quantity:	1 mg
Target:	HUP
Protein Characteristics:	AA 1-214
Origin:	Mycobacterium tuberculosis
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This HUP protein is labelled with His tag.
Application:	ELISA

Product Details

Sequence:	MNKAELIDVL TQKLGSDRRQ ATAAVENVVD TIVRAVHKGD SVTITGFGVF EQRRRAARVA RNPRTGETVK VKPTSVPAFR PGAQFKAVVS GAQRLPAEGP AVKRGVGASA AKKVAKKAPA KKATKAAKKA ATKAPARKAA TKAPAKKAAT KAPAKKAVKA TKSPAKKVTK AVKKTAVKAS VRKAATKAPA KKAAAKRPAT KAPAKKATAR RGRK
Specificity:	Mycobacterium tuberculosis
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	HUP

Target Details

Alternative Name:	DNA-binding protein HU homolog (hup) (HUP Products)
Background:	Recommended name: DNA-binding protein HU homolog. Alternative name(s): 21 kDa laminin-2-binding protein 28 kDa iron-regulated protein. Short name= Irep-28 Histone-like protein. Short name= Hlp
UniProt:	P95109

Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
