

Datasheet for ABIN1510194 **DPH1 Protein (AA 1-436) (His tag)**

Overview

Quantity:	1 mg
Target:	DPH1
Protein Characteristics:	AA 1-436
Origin:	Schizosaccharomyces pombe
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This DPH1 protein is labelled with His tag.
Application:	ELISA

7.ppilodion.	
Product Details	
Sequence:	MAEVKKSIPK RRFVGKKNRK ENNLDGSNRD VENAALVTIN SKRSAGRVAT QIPEDILNDK
	AINEAIKLLP QNYNFEIHKT IWHIRLRKAK RVALQLPEGL LMFGCILSDI FEQFCQVETI

	AVEKARTAKK FGLIQGTLGR QGSPKVLENL KNTLRKNNKD FVCVLMSEIF PSRLGQFSDI
	DAWIQVACPR LSIDWGYAFP APLLTPYEAS AAFNVVPWKE VYPMDFYATN SLGNWTPNNP
	ENRPLPNRKK TGPVSS
Specificity:	Schizosaccharomyces pombe (strain 972 / ATCC 24843) (Fission yeast)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.

Product Details > 90 % Purity: **Target Details** DPH1 Target: Diphthamide biosynthesis protein 1 (dph1) (DPH1 Products) Alternative Name Recommended name: Diphthamide biosynthesis protein 1 Background: UniProt: 059713 **Application Details** Comment: The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies. Restrictions: For Research Use only Handling Format: Lyophilized Concentration: 0.2-2 mg/mL Buffer: Tris-based buffer, 50 % glycerol

Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.

Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to

Handling Advice:

Storage Comment:

Storage:

one week

-20 °C
