## Datasheet for ABIN1510278 VPS25 Protein (AA 1-175) (His tag)

| Overview                      |  |
|-------------------------------|--|
| Quantity:                     | 1 mg   |
| Target:                       | VPS25  |
| Protein Characteristics:      | AA 1-175   |
| Origin:                       | Schizosaccharomyces pombe  |
| Source:                       | Yeast  |
| Protein Type:                 | Recombinant  |
| Purification tag / Conjugate: | This VPS25 protein is labelled with His tag.   |
| Application:                  | ELISA  |
| Product Details               |  |
| Sequence:                     | MRVPSIYNFP PFFTRQLNDN TWHSQKAAWQ MWILLWCREN RQTSITINPE LLESSLLHNS                                |
|                               | TIHRTLPLSV FREIVEDMVK QNLAEWTEKR NPKDVFWVYW RSISEWGNMI LKWLSDMGRE                                |
|                               | GSICTFYELQ EQYKEVDCLD EVLLHKVLEL LMKKGNIELM KGSSGKYSGF KVLKA                                     |
| Specificity:                  | Schizosaccharomyces pombe (strain 972 / ATCC 24843) (Fission yeast)                              |
| Characteristics:              | Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien |
|                               | cells or by baculovirus infection. Be aware about differences in price and lead time.            |
| Purity:                       | > 90 %   |
| Target Details                |  |
| Target:                       | VPS25  |
| Abstract:                     | VPS25 Products   |

| Target Details      |  |
|---------------------|--|
| Background:         | Recommended name: Vacuolar protein-sorting-associated protein 25   |
| UniProt:            | 074967   |
| Application Details |  |
| Comment:            | The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is |
|                     | of very high-quality and close to the natural protein. But the low expression level, the high cost   |
|                     | of medium and the culture conditions restrict the promotion of mammalian cell expression   |
|                     | systems. The yeast protein expression system serve as a eukaryotic system integrate the  |
|                     | advantages of the mammalian cell expression system. A protein expressed by yeast system  |
|                     | could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the   |
|                     | native protein conformation. It can be used to produce protein material with high added value  |
|                     | that is very close to the natural protein. Our proteins produced by yeast expression system has  |
|                     | been used as raw materials for downstream preparation of monoclonal antibodies.  |
| Restrictions:       | For Research Use only  |
| Handling            |  |
| Format:             | Lyophilized  |
| Concentration:      | 0.2-2 mg/mL  |
| Buffer:             | Tris-based buffer, 50 % glycerol   |
| Handling Advice:    | Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week  |
| Storage:            | -20 °C   |
| Storage Comment:    | Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.   |
