## Datasheet for ABIN1510282 Sorting Nexin 3 Protein (SNX3) (AA 1-143) (His tag)

Overview

01011010	
Quantity:	1 mg
Target:	Sorting Nexin 3 (SNX3)
Protein Characteristics:	AA 1-143
Origin:	Schizosaccharomyces pombe
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This Sorting Nexin 3 protein is labelled with His tag.
Application:	ELISA
Product Details	
Sequence:	MDKLSRPEIR QQTTQQMYDV PENILEIDVI NPQTHGIGRN MFTTYEIVCR TNMPYFRLHN
	SSVRRRYSEF EKFHDMLERE SGRVSIPPLP GKIFTQRFRD DVIEERRQGL ENFLRLVAGH
	PLIQTHSRVL SSFLQSPEFK PTP
Specificity:	Schizosaccharomyces pombe (strain 972 / ATCC 24843) (Fission yeast)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %
Target Details	
Target:	Sorting Nexin 3 (SNX3)
Alternative Name:	Sorting nexin-3 (snx3) (SNX3 Products)

International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 1/2 | Product datasheet for ABIN1510282 | 09/11/2023 | Copyright antibodies-online. All rights reserved.

Target Details	
Background:	Recommended name: Sorting nexin-3
UniProt:	094291
Application Details	
Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is
Restrictions:	<ul> <li>of very high-quality and close to the natural protein. But the low expression level, the high cost</li> <li>of medium and the culture conditions restrict the promotion of mammalian cell expression</li> <li>systems. The yeast protein expression system serve as a eukaryotic system integrate the</li> <li>advantages of the mammalian cell expression system. A protein expressed by yeast system</li> <li>could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the</li> <li>native protein conformation. It can be used to produce protein material with high added value</li> <li>that is very close to the natural protein. Our proteins produced by yeast expression system has</li> <li>been used as raw materials for downstream preparation of monoclonal antibodies.</li> </ul> For Research Use only
Handling	
Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
