

Datasheet for ABIN1511416

PSMA1 Protein (AA 1-266) (His tag)[Go to Product page](#)

Overview

Quantity:	1 mg
Target:	PSMA1
Protein Characteristics:	AA 1-266
Origin:	Trypanosoma brucei
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This PSMA1 protein is labelled with His tag.
Application:	ELISA

Product Details

Sequence:	MFKNQYD TDT TTWSPTGRLF QVEYANEAVN NGSAAVGVKG ADYVVL TALK RNPVSG LSSY QEKA FKLDEH VGMAISGLVA DGRALSRFLR TECMNYRYMH DSDAPLVMLA DIVGAKHQRH IQFAGKRPFG VGLLIAGYDR QGPRLYQTVP SGDVFDKAT AMGLRSQAAR TYLERHFRGF PACDLDELVM HALRALGAAT SGGVELNIKN TTIAIVGKGT PFTILTEEEA RKYLDGFKTR PEDIPAVADN EEDDELHEQ PPDVEE
Specificity:	Trypanosoma brucei rhodesiense
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	PSMA1
Alternative Name:	Proteasome subunit alpha type-1 (PSMA1 Products)
Background:	Recommended name: Proteasome subunit alpha type-1. EC= 3.4.25.1. Alternative name(s): 20S proteasome subunit alpha-6
UniProt:	O96788
Pathways:	Mitotic G1-G1/S Phases , DNA Replication , Synthesis of DNA

Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
