## Datasheet for ABIN1511592 LYRM1 Protein (AA 1-122) (His tag)

| Overview                      |   |
|-------------------------------|---|
| Quantity:                     | 1 mg  |
| Target:                       | LYRM1   |
| Protein Characteristics:      | AA 1-122  |
| Origin:                       | Xenopus laevis  |
| Source:                       | Yeast   |
| Protein Type:                 | Recombinant   |
| Purification tag / Conjugate: | This LYRM1 protein is labelled with His tag.  |
| Application:                  | ELISA   |
| Product Details               |   |
| Sequence:                     | MTAGTRPEVL HLYRQIFRIA RKWQAASGLM EETIKEREYI VDEARKLFHR NKQITDVAMI<br>KECTEECKAR IEIGLHYRNP YPRPIHLPPL GLALPHSKVF RAQEKLRKQA KPVYLKSYDE IS |

|                   | KECTEECKAR IEIGLHYRNP YPRPIHLPPL GLALPHSKVF RAQEKLRKQA KPVYLKSYDE IS   |
|-------------------|--|
| Specificity:      | Xenopus laevis (African clawed frog)   |
| Characteristics:  | Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien cells or by baculovirus infection. Be aware about differences in price and lead time. |
| Purity:           | > 90 %   |
| Target Details    |  |
| Target:           | LYRM1  |
| Alternative Name: | LYR motif-containing protein 1 (lyrm1) (LYRM1 Products)  |

| Target Details      |   |
|---------------------|---|
| Background:         | Recommended name: LYR motif-containing protein 1  |
| UniProt:            | A9UMQ3  |
| Application Details |   |
| Comment:            | The yeast protein expression system is the most economical and efficient eukaryotic system<br>for secretion and intracellular expression. A protein expressed by the mammalian cell system is<br>of very high-quality and close to the natural protein. But the low expression level, the high cost<br>of medium and the culture conditions restrict the promotion of mammalian cell expression<br>systems. The yeast protein expression system serve as a eukaryotic system integrate the<br>advantages of the mammalian cell expression system. A protein expressed by yeast system |
|                     | could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the<br>native protein conformation. It can be used to produce protein material with high added value<br>that is very close to the natural protein. Our proteins produced by yeast expression system has<br>been used as raw materials for downstream preparation of monoclonal antibodies.   |
| Restrictions:       | For Research Use only   |
| Handling            |   |
| Format:             | Lyophilized   |
| Concentration:      | 0.2-2 mg/mL   |
| Buffer:             | Tris-based buffer, 50 % glycerol  |
| Handling Advice:    | Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week   |
| Storage:            | -20 °C  |
| Storage Comment:    | Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.  |
