Datasheet for ABIN1511803

SWI5 Protein (AA 1-105) (His tag)

Overview	
Quantity:	1 mg
Target:	SWI5
Protein Characteristics:	AA 1-105
Origin:	Xenopus tropicalis
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This SWI5 protein is labelled with His tag.
Application:	ELISA
Product Details	
Sequence:	MRRNCNAGFK SPVQSPSSSS SGRGSEYSLQ KEVSELQGKE AALDQEIAQL ESEGFSMAEL

Sequence:	MRRNCNAGFK SPVQSPSSSS SGRGSEYSLQ KEVSELQGKE AALDQEIAQL ESEGFSMAEL
	EEHITLLHEY NELKDVGQML LGRLAVLRGV TTKELYAEFG MNLED
Specificity:	Xenopus tropicalis (Western clawed frog) (Silurana tropicalis)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	SWI5
Alternative Name:	DNA repair protein SWI5 homolog (swi5) (SWI5 Products)

Target Details

Background:	Recommended name: DNA repair protein SWI5 homolog.
	Alternative name(s): Protein SAE3 homolog
UniProt:	A9UL70

Application Details

Comment:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
