

## Datasheet for ABIN1511853 ZNRF1 Protein (AA 2-195) (His tag)

Overview Quantity: 1 mg ZNRF1 Target: Protein Characteristics: AA 2-195 Origin: Xenopus tropicalis Yeast Source: Protein Type: Recombinant Purification tag / Conjugate: This ZNRF1 protein is labelled with His tag. Application: ELISA **Product Details** Sequence: GGKQSSASR SRAPFPGVSS DDSAVPPSSN FGHFRAGGAM GLRSRSVSSV SGLDPPAPGL PFGLYRAGPD TERGGSSGSE DSRGDLYLGS RASLADTLQI APRWIGAHSG FRCPICSKSV APDEMEMHFI MCLSKPRLSY NDDVLTRDAG ECVICLEELS QGDTIARLPC LCIYHKSCID SWFEVNRCCP EHPSD Xenopus tropicalis (Western clawed frog) (Silurana tropicalis) Specificity: Characteristics: Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien cells or by baculovirus infection. Be aware about differences in price and lead time. Purity: > 90 % **Target Details** Target: ZNRF1

Target Details	
Alternative Name:	E3 ubiquitin-protein ligase znrf1 (znrf1) (ZNRF1 Products)
Background:	Recommended name: E3 ubiquitin-protein ligase znrf1.
	EC= 6.3.2
	Alternative name(s): Zinc/RING finger protein 1
UniProt:	F7EP40
Application Details	
Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system
	for secretion and intracellular expression. A protein expressed by the mammalian cell system is
	of very high-quality and close to the natural protein. But the low expression level, the high cost
	of medium and the culture conditions restrict the promotion of mammalian cell expression
	systems. The yeast protein expression system serve as a eukaryotic system integrate the
	advantages of the mammalian cell expression system. A protein expressed by yeast system
	could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the
	native protein conformation. It can be used to produce protein material with high added value
	that is very close to the natural protein. Our proteins produced by yeast expression system has
	been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only
Handling	
Format:	Lyophilized
Concentration:	0.2-2 mg/mL

Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
