Overview

Quantity: 200 μ L

Conjugate: HRP

Application: ELISA

Product Details

Target Details

Background: CGMP-peroxidase conjugate is a product most suitable for The THETM Anti cGMP monoclonal antibody

Application Details

Application Notes: Working concentrations for specific applications should be determined by the investigator. The appropriate concentrations may be affected by the antibody affinity, the sensitivity of the method of detection, temperature, the length of the incubations, and other factors. The suitability of this product for applications other than those listed below has not been determined. The following concentration ranges are recommended starting points for this product. ELISA: 1:10,000 - 1:20,000 Other: user-optimized

Restrictions: For Research Use only

Handling

Format: Liquid

Storage: -20 °C

Handling

Storage Comment: The conjugate can be stored for up to two years at -20°C or below.

Expiry Date: 24 months
