Clone:	RB39189
Isotype:	Ig Fraction
Purification:	This antibody is purified through a protein A column, followed by peptide affinity purification.

Target Details

Target:	RHOH
Alternative Name:	RHOH (RHOH Products)
Background:	The protein encoded by this gene is a member of the Ras superfamily of small GTPases.

Target Details

	Expression of a chimeric transcript of LAZ3 and this gene has been reported as a result of the translocation t(3,4) in non-Hodgkin's lymphomas. This gene encodes a small G-like protein, and unlike most other small G proteins which are expressed ubiquitously, this gene is transcribed only in hemopoietic cells.
