#### Target Details

Target:	Sorting Nexin 7 (SNX7)
Alternative Name:	SNX7 ( <a href="#">SNX7 Products</a> )

## Target Details

**Background:** This gene encodes a member of the sorting nexin family. Members of this family contain a phox (PX) domain, which is a phosphoinositide binding domain, and are involved in intracellular trafficking. This protein does not contain a coiled coil region like some family members, and its exact function is unknown. Alternative splicing results in multiple transcript variants. A related pseudogene has been identified on chromosome 11. [provided by RefSeq].
