Product Details		
Immunogen:	This CTNNBL1 antibody is generated from rabbits immunized with a KLH conjugated synthetic	
	peptide between 16-43 amino acids from the N-terminal region of human CTNNBL1.	
Clone:	RB36904	
Isotype:	Ig Fraction	
Purification:	This antibody is purified through a protein A column, followed by peptide affinity purification.	
Target Details		
Target:	CTNNBL1	
Alternative Name:	CTNNBL1 (CTNNBL1 Products)	
Background:	The protein encoded by this gene contains an acidic domain, a putative bipartite nuclear	
	localization signal, a nuclear export signal, a leucine-isoleucine zipper, and phosphorylation	

motifs. In addition, the encoded protein contains Armadillo/beta-catenin-like repeats, which

	have been implicated in protein-protein interactions. Although the function of this protein has not been determined, the C-terminal portion of the protein has been shown to possess apoptosis-inducing activity. [provided by RefSeq].
