Datasheet for ABIN1591668

Cob(II)yrinic Acid A,c-Diamide Reductase Protein (BLUB) (AA 1-207) (His tag)

Overview

Quantity:	1 mg
Target:	Cob(II)yrinic Acid A,c-Diamide Reductase (BLUB)
Protein Characteristics:	AA 1-207
Origin:	Rhodobacter capsulatus
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This Cob(II)yrinic Acid A,c-Diamide Reductase protein is labelled with His tag.
Application:	ELISA

Product Details

Sequence:	MNFEQTHRDA LTEVLRWRRD VRHFRDPID EAVIDLRAV MDMAPSVGNA RPWRVIRVDS PALRAEVLAN FNAARAAAGS AYAGEQAEAY ATCLKLQGIDQ APLQLAVFTH RDPAAAGHGLG RASMPVTLQQ STAMAIHTLW LAARAENLGL GMVSVLDPKA VERLLNAPPD WDFVAWLCIG VPEFTDDTPL LHRAGWQENL PTEWERR
Specificity:	Rhodobacter capsulatus (strain ATCC BAA-309 / NBRC 16581 / SB1003)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	Cob(II)yrinic Acid A,c-Diamide Reductase (BLUB)
---------	-------------------------------------------------

Target Details

Alternative Name:	Putative cob (II)yrinic acid a,c-diamide reductase (BLUB Products)
Background:	Recommended name: Putative cob(II)yrinic acid a,c-diamide reductase. EC= 1.16.8.1
UniProt:	D5AV14

Application Details

Comment:	<p>The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.</p>

Restrictions:	For Research Use only
---------------	-----------------------

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
