

Datasheet for ABIN1593173  
**OXYR Protein (AA 1-311) (His tag)**

[Go to Product page](#)

## Overview

Quantity:	1 mg
Target:	OXYR
Protein Characteristics:	AA 1-311
Origin:	Mycobacteria
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This OXYR protein is labelled with His tag.
Application:	ELISA

## Product Details

Sequence:	MTDKSYQPTL AGLRAVAVA EKQHFQSAAN ALGVSQSTLS QALAALEAGL NLHLVERSTR RVFLTTEGRS LLPHAQAAVE AVEAFTTAAA GEADPLNGSI RFGIIPTVAP YVLPTVLAGL TRRLPTLTVR VIEDQTERLL TALREGSLDT ALIALPADYR GLTEMPYEE DFLALPPGH PMADRHGVPV AALSELPLLL LDEGHCLRDQ ALDVCQNAGV RAEADTRAA SLATAVQCVN GGLGVTLPQ SAVSVEAARS RVGLAHFAAP TPGRRIGLVY RASSGRDEAY RLAAIMGES IGNEQQVRLV N
Specificity:	Mycobacterium marinum
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

## Target Details

Target:	OXYR
Alternative Name:	Probable hydrogen peroxide-inducible genes activator (oxyR) ( <a href="#">OXYR Products</a> )
Background:	Recommended name: Probable hydrogen peroxide-inducible genes activator
UniProt:	<a href="#">087324</a>

## Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modiflicated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

## Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
