## COX IV Protein (AA 1-144) (His tag)

$\sim$	
( )\/△	rview
$\cup$	1 410 44

Overview	
Quantity:	1 mg
Target:	COX IV (COX4I1)
Protein Characteristics:	AA 1-144
Origin:	Old World Monkey
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This COX IV protein is labelled with His tag.
Application:	ELISA
Product Details	
Sequence:	SVVKSEDFTL PAYVDRRDYP LPDVAHVKHL SASQKALKEK EKASWSSLSM DEKVELYRIK
	FKESFAEMNR RSNEWKTVVG TAMFFFGITA LIVMWEKRYV YGPLPQTFDK EWVAMQTKRM
	LDMKVNPIQG LASKWDYEKN EWKK
Specificity:	Theropithecus gelada (Gelada baboon)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %
Target Details	
Target:	COX IV (COX4I1)
Alternative Name:	Cytochrome c oxidase subunit 4 isoform 1, mitochondrial (COX4I1) (COX4I1 Products)
, incorrigin o marrior	

#### **Target Details**

Background:
Recommended name: Cytochrome c oxidase subunit 4 isoform 1, mitochondrial.

Alternative name(s): Cytochrome c oxidase polypeptide IV Cytochrome c oxidase subunit IV isoform 1.

Short name= COX IV-1

UniProt:
O46581

Pathways:
Proton Transport

#### **Application Details**

#### Comment:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

### Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
