

Datasheet for ABIN1608023

**COX5B Protein (AA 32-129, full length) (GST tag)**[Go to Product page](#)**1** Image

## Overview

Quantity:	1 mg
Target:	COX5B
Protein Characteristics:	AA 32-129, full length
Origin:	Human
Source:	Escherichia coli (E. coli)
Protein Type:	Recombinant
Purification tag / Conjugate:	This COX5B protein is labelled with GST tag.
Application:	ELISA

## Product Details

Sequence:	ASGGGVPTDE EQATGLEREI MLAACKGLDP YNVLAPKGAS GTREDPNLVP SISNKRIVGC ICEEDNTSVV WFWLHKGEAQ RCPRCGAHYK LVPQQLAH
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	95 %

## Target Details

Target:	COX5B
Alternative Name:	Cytochrome c oxidase subunit 5B, mitochondrial protein ( <a href="#">COX5B Products</a> )
Background:	This protein is one of the nuclear-coded polypeptide chains of cytochrome c oxidase, the terminal oxidase in mitochondrial electron transport.

## Target Details

Molecular Weight: 38 kD

UniProt: [P10606](#)

## Application Details

**Comment:** The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

**Restrictions:** For Research Use only

## Handling

**Format:** Lyophilized

**Concentration:** 0.2-2 mg/mL

**Buffer:** Tris-based buffer, 50 % glycerol

**Handling Advice:** Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week

**Storage:** -20 °C

**Storage Comment:** Store at -20 °C for extended storage, conserve at -20 °C or -80 °C

SDS-PAGE

**Image 1.** Cytochrome C Oxidase Subunit Vb (COX5B) (AA 32-129), (full length) protein (GST tag)
