NCR3 Protein (AA 19-135) (His tag)[Go to Product page](#)

Overview

Quantity:	1 mg
Target:	NCR3
Protein Characteristics:	AA 19-135
Origin:	Cynomolgus
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This NCR3 protein is labelled with His tag.
Application:	ELISA

Product Details

Sequence:	LW VSQPPEIRTL EGSSAFLPCS FNASQGRLAI GSVTWFRDEV APGKEVRNGT PEFGRGLAPL SSSRFLRDHQ AELHIWDVRG HDAGIYVCRV EVLGLGVGTG NGTRLVVEKE YPQLG
Specificity:	Macaca fascicularis (Crab-eating macaque) (Cynomolgus monkey)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	NCR3
Abstract:	NCR3 Products

Target Details

Background:	Recommended name: Natural cytotoxicity triggering receptor 3. Alternative name(s): Natural killer cell p30-related protein. Short name= NK-p30. Short name= NKp30 CD_antigen= CD337
UniProt:	P61483
Pathways:	Regulation of Leukocyte Mediated Immunity , Positive Regulation of Immune Effector Process

Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modiflicated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
